Lloyd Trimline DINETTES

IN BLACK 'N GOLD COLOR

THE distinguishing feature of Lloyd's new Trimline group is the striking "Black 'n Gold Color" scheme in which the black legs are smartly offset by the new Gold Color trim. The new Trimline group is further enhanced by a fine array of plastic table tops and vinyl chair covers in a range of modern patterns and colors (see price list for patterns and colors).

The table legs, of ¾" tubing, are shipped with leg scroll, ferrules and glides assembled so that there is no extra work involved to attach these parts. Floor glides, of 1¼" diameter metal, are self-aligning, assuring firm contact with the floor. The 3" high leg ferrules are Gold Color metal, while the leg scroll is a strong polished metal casting. Where metal aprons are used, this is of high quality anodized extruded aluminum.

Chair frames are of ¾" tubing, with the legs equipped with matching Gold Color metal ferrules. The floor glides are of clear plastic that will not discolor the floor, and are angled to maintain flat contact with the floor.

Lloyd Chrome DINETTES

THE Lloyd Chrome Dinette group illustrated and described on the following pages represents a wide range of table sizes — 24″ x 36″ to 42″ x 90″ to be exact — and a relatively extensive line of chairs. The styling is clean and refreshing to the eye, and color combinations to satisfy many tastes may be selected from the wide choice of patterns and colors in plastic table tops and vinyl plastic chair covers (see price list for patterns and colors).

The tables in this group have legs made of 1″ tubular steel, and aprons of chrome-plated steel. The floor glides are of clear plastic, which by nature does not stain or discolor floor surfaces.

1″ chrome-plated steel tubing is used for the chair frames so as to match the table legs in appearance. Clear plastic is likewise used for the floor glides of the chair legs, and are also angled to maintain a flat contact with the floor.

SELF-STORING FOLDING EXTENSION LEAVES

It's just a matter of seconds to place this self-storing folding leaf in position when a larger table surface is desired. The leaf and the apron on the leaf fold up and are stored underneath the table top when not in use.

Notice that the T-3022 table illustrated on this page easily accommodates ten chairs when extended to its full 90″ length. Tables T-3014 and T-3021 are also made in the 42″ width and extra long to seat more people than the average size table does.

Lloyd Wood PLASTIC TOP DINETTES

A PLASTIC table top surface that matches the grain and color of the Platinum wood finish is the important feature of Lloyd Wood Dinettes. Harmonizing nicely with the Platinum finish is the Gold Color metal trim, such as the banding around the table top, the leg rods and the back supports and leg brackets of the chairs.

The legs of both tables and chairs, and the aprons of the tables, are of hardwood and finished in Platinum. All tables (except T-5016) and chairs are of K.D. construction with legs rigidly attached by means of strong metal brackets, which are so designed to permit quick and easy assembly. Particular attention is therefore called to the fact that these wood dinette chairs thereby earn a low K.D. shipping rate.

Chair covers are available in either soft fabrics, or vinyl plastic in a range of patterns and colors (see price list).
